Journal of Testing and Evaluation
Subject Index to Volume 11
1983

A

Accuracy
Mechanical sampling with stopped-belt accuracy (Ellis), March, 106
Reference materials—what they are and how they should be used (Taylor), Nov., 385
Aging (metallurgy)
Life expectancy for fossil steam turbine casings after 100 000 hours (Coulon, Saisse, and Thauvin), Jan., 16
Aging tests (materials)
Basis for predicting longtime behavior from short-time tests of geothermal sealants (Kearsley), July, 299
Airports
Cost-effectiveness of the passenger security screening system (Childs), Nov., 376
Effectiveness of passenger security screening—an overview (Tsacoumis), Nov., 366
Introduction to symposium on controlled access screening for airport security areas (Battema), Nov., 365
Passenger screening requirements—the view from Europe (Keane), Nov., 381
Safety considerations for photographic film in the X-ray screening of air travelers' luggage (McIninch), Nov., 368
Training the security screening station operator (Hunter), Nov., 379
Amplitude
Vibratory cavitation tests at 200-kPa (2-bar) suppression pressure (Zhou and Hammitt), March, 134
Aviation safety
Effectiveness of passenger security screening—an overview (Tsacoumis), Nov., 366
Axial stress
Cyclic stress-strain and fatigue properties of sheet steel as affected by load spectra (Martin), Jan., 66

B

Bituminous concretes
Analysis of nonlinear behavior of asphalt concrete during Marshall test (Mamlouk, Yuan, Tseng, and Lee), Sept., 327
Experimental analysis and numerical simulation of Marshall method of asphalt concrete mix design (Mamlouk and Manolis), March, 99
Boiling points
Most probable pore-size distribution in fluid filter media I. Evidence of such a distribution from results of extended bubble-point measurements (Johnston), March, 117
Bonding
Shear transfer in concrete and polymer modified concrete members subjected to shearing loads (Nawy and Ukadike), March, 89
Book reviews
Biological Performance of Materials: Fundamentals of Biocompatibility by Black (Rylee), Jan., 85
Building Design and Construction Handbook by Merritt (Lieff), May, 231
Cobalt and Its Alloys by Betteridge (Carlson), Nov., 392
Design of Prestressed Concrete Structures by Lin and Burns (Coons), May, 227
Detection and Measurement of Hazardous Gases by Cullis and Firth (Oatess), May, 231
Dynamics of Structures and Machinery by Szuladzinski (Huang), May, 229
Electronic Structure and Properties by Fradin (Kimerling), May, 229
Elements of Materials Science and Engineering, Fourth Edition by Van Vlack (Pope), March, 163
The Encyclopedia of Mineralogy by Frye (Kallmann), March, 160
Energy Conservation and Thermal Insulation by Derricott and Chissick (Woychik), Sept., 353
Experimental Evaluation of Stress Concentration and Intensity Factors by Sih (Srawley), March, 163
The Flammability Handbook of Plastics by Hilado (Brown), July, 304
The Govmark Book on Flammability Standards and Flammability Test Methods of Textiles, Plastics and Other Materials Used in Home and Contract Furnishings (Roux), Sept., 352
Handbook of Materials Testing Reactors and Associated Hot Laboratories in the European Community by von der Hardt and Rottger (Morgan), Jan., 82
International Developments in Experimental Mechanics by Rossi (Roderick), Sept., 352
International Progress in Urethanes by Ashio and Frisch (Kolditz), July, 304
Introduction to Metallurgical Thermodynamics by Gaskell (Widge), Jan., 85
Introduction to the Theory of Thin Shells by Mollmann (Luchini), March, 161
Joints in Structural Steelwork by Howlett et al (Oudheusden), Jan., 83
Matrix Methods of Structural Analysis by Kanchi (Fenves), Jan., 82
The Mechanics of Fracture and Fatigue: An Introduction by Parker (Dowling and Ernst), May, 228
Mechanics of Wood and Wood Composites by Bodig and Jayne (Pinson), Sept., 352
Plastics Materials and Processes by Schwartz and Goodman (Miller), July, 305
Polymer Degradation—Principles and Practical Applications by Schnabel (Kinmonth), May, 230
Polymer Latices and Their Applications by Calvert (Hecker), Jan., 82
Progress in Boundary Element Methods by Brebbia (Padovan), Jan., 84
Research Techniques in Nondestructive Testing, Vol. 5 by Sharpe (Moyer), July, 306
Review of Polymers and Their Properties, Vol. 1 by Hearle (Larsen), July, 305
Simplified Design of Building Trusses for Architects and Builders by Parker and Ambrose (Ratliff), May, 232
Soares' Grounding Electrical Distribution Systems for Safety by Summers (Overn), March, 162
Steel Diaphragm Roof Decks. A Design Guide with Tables for Engineers and Architects by Bryan and Davies (Errera), March, 160
Structural Masonry Designers' Manual by Curtin et al (Yorkdale), May, 233
Structural Use of Wood in Adverse Environments by Meyer and Kellogg (Diekmann), May, 227
Synfuels: the Problems and the Promises by Hoffman (Walker), March, 164
Treatise on Materials Science and Technology. Vol. 20: Ultrarapid Quenching of Liquid Alloys by Herman (Gower), Nov., 392
Ultrasonic Testing-Non-Conventional Testing Techniques by Szilard (McClung), March, 162

C-E

Carburizing
Effects of temperature on the fracture toughness of carburizing steels for high-temperature applications (Cutler and Leslie), Jan., 3
Chemical analysis
Reference materials—what they are and how they should be used (Taylor), Nov., 385
Clustering
Short-range ordering in nickel-chromium thermocouple alloys (Pollock), May, 225
Cohesion
Shear transfer in concrete and polymer modified concrete members subjected to shearing loads (Nawy and Ukadike), March, 89
Concrete
Shear transfer in concrete and polymer modified concrete members subjected to shearing loads (Nawy and Ukadike), March, 89
Copolymers
Cross-linking of polyfluoroolefin copolymers (Hudlicky), July, 279
Cracking (fracturing)
Summary of fracture mechanics concepts (Irwin and de Wit), Jan., 56
Crack initiation
Fatigue crack front shape and its effect on fracture toughness measurements (Towers), Jan., 34
New method for the determination of the critical value of crack tip opening displacement at the initiation of crack growth using a single three-point bend specimen (Lai and Zhang), Sept., 340
Review of the effects of fatigue cracking loads on plane strain fracture toughness (Towers), Jan., 27
Crack propagation
Accuracy and precision of crack length measurements using a compliance technique (Hewitt), March, 150
Fracture mechanics analysis of the effects of residual stress on fatigue life (Throop), Jan., 75
Improved method for threshold fatigue crack propagation testing on an electromagnetic

resonance type machine (Nishijima, Matsuoka, and Ohtsubo), May, 193
New transducer to monitor fatigue crack propagation (Liaw, Hartmann, and Logsdon), May, 202
Cracks
Analysis of an internally radially cracked ring segment subject to three-point radial loadings (Gross and Srawley), Nov., 357
Cross-linking
Cross-linking of polyfluoroolefin copolymers (Hudlicky), July, 279
Cyclic axial straining
Cyclic stress-strain and fatigue properties of sheet steel as affected by load spectra (Martin), Jan., 66
Damping
Determination of stress relaxation by damping measurements (Weissmann), Jan., 79
Degradation
Basis for predicting longtime behavior from short-time tests of geothermal sealants (Kearsley), July, 299
Displacement
Analysis of nonlinear behavior of asphalt concrete during Marshall test (Mamlouk, Yuan, Tseng, and Lee), Sept., 327
Ductility
J_{Ic} measurement point determination of HY130, CMS-9, and inconel alloy 718 (Matthews and West), May, 217
Elastic properties
J_{Ic} measurement point determination of HY130, CMS-9, and inconel alloy 718 (Matthews and West), May, 217
Elastomers
Cross-linking of polyfluoroolefin copolymers (Hudlicky), July, 279
Ethylene-propylene-diene monomer (EPDM) and geothermal environment (Harwood), July, 289
Embrittlement
Life expectancy for fossil steam turbine casings after 100 000 hours (Coulon, Saisse, and Thauvin), Jan., 16
Energy
Pilot experiment to determine the feasibility of reconstituting tested irradiated Charpy V specimens (Burch), Sept., 312
Energy dissipation
Determination of stress relaxation by damping measurements (Weissmann), Jan., 79

F

Fatigue life
Constant amplitude fatigue study of an aluminum powder metallurgy alloy (Santner and Campbell), Sept., 333
Fatigue (materials)
Accuracy and precision of crack length measurements using a compliance technique (Hewitt), March, 150
Cyclic stress-strain and fatigue properties of sheet steel as affected by load spectra (Martin), Jan., 66
High pressure fatigue testing with results for tubing and fittings (Findley and Reed), March, 156
Improved method for threshold fatigue crack propagation testing on an electromagnetic resonance type machine (Nishijima, Matsuoka, and Ohtsubo), May, 193
New transducer to monitor fatigue crack propagation (Liaw, Hartmann, and Logsdon), May, 202
Review of the effects of fatigue cracking loads on plane strain fracture toughness (Towers), Jan., 27
Fluid filters
Most probable pore-size distribution in fluid filter media I. Evidence of such a distribution from results of extended bubble-point measurements (Johnston), March 117
Most probable pore-size distribution in fluid filter media II. Determining the size of the average pore from fluid permeability measurements (Johnston), March, 122
Ethylene-propylene-diene monomer (EPDM) and geothermal environment (Harwood), July, 289
Forming techniques
In-plane compression: a new laboratory forming technique to study the effect of large drawing deformations in sheets on their subsequent mechanical behavior (Charpentier and Piehler), Jan., 46
Fractography
Fractographic examination in the scanning electron microscope as a tool in evaluating through-thickness tension test results (McDonald and Ludwigson), May, 165
Fracture properties
J_{Ic} measurement point determination of HY130, CMS-9, and inconel alloy 718 (Matthews and West), May, 217
Fracture tests
Effects of temperature on the fracture toughness of carburizing steels for high-temperature applications (Cutler and Leslie), Jan., 3
Fatigue crack front shape and its effect on fracture toughness measurements (Towers), Jan., 34
Summary report of round robin testing by the ASTM task group E24.01.06 on rapid loading plane-strain fracture toughness K_{Ic} testing (Shoemaker and Seeley), July, 261
Fractures (materials)
Summary of fracture mechanics concepts (Irwin and de Wit), Jan., 56
Numerical analysis of ductile fracture experiments using single-edge notched tension specimens (Hollstein, Schmitt, and Blauel), May, 174
Summary report of round robin testing by the ASTM task group E24.01.06 on rapid loading plane-strain fracture toughness K_{Ic} testing (Shoemaker and Seeley), July, 261
Frequencies
Vibratory cavitation tests at 200-kPa (2-bar) suppression pressure (Zhou and Hammitt), March, 134

H-R

Hardness
Predicting heat-affected zone hardness by the weld test method (Bibby, Chong, and Goldak), March, 126
Heat-affected zone
Predicting heat-affected zone hardness by the weld test method (Bibby, Chong, and Goldak), March, 126
High pressure tests
High pressure fatigue testing with results for tubing and fittings (Findley and Reed), March, 156
Hydrocarbons
Ethylene-propylene-diene monomer (EPDM) and geothermal environment (Harwood), July, 289
Hydrogen
Positron evaluation of hydrogen in a 17 nickel maraging steel (Moore, Cocks, and Jones), Sept., 309
Impact tests
Pilot experiment to determine the feasibility of reconstituting tested irradiated Charpy V specimens (Burch), Sept., 312
Inclusions
Fractographic examination in the scanning electron microscope as a tool in evaluating through-thickness tension test results (McDonald and Ludwigson), May, 165
Laminar flow
Most probable pore-size distribution in fluid filter media II. Determining the size of the average pore from fluid permeability measurements (Johnston), March, 122
Low alloy steels
Pilot experiment to determine the feasibility of reconstituting tested irradiated Charpy V specimens (Burch), Sept., 312
Measurement
Accuracy and precision of crack length measurements using a compliance technique (Hewitt), March, 150
Reference materials—what is available? (Bingham), Nov., 388
Mechanical properties
In-plane compression: a new laboratory forming technique to study the effect of large drawing deformations in sheets on their subsequent mechanical behavior (Charpentier and Piehler), Jan., 46
Mechanical tests
Mechanical sampling with stopped-belt accuracy (Ellis), March, 106
Metal sheets
In-plane compression: a new laboratory forming technique to study the effect of large drawing deformations in sheets on their subsequent mechanical behavior (Charpentier and Piehler), Jan., 46
Modulus of elasticity
Experimental analysis and numerical simulation of Marshall method of asphalt concrete mix design (Mamlouk and Manolis), March, 99
Summary of fracture mechanics concepts (Irwin and de Wit), Jan., 56
Nickel-chromium alloys
Short-range ordering in nickel-chromium thermocouple alloys (Pollock), May, 225
Nondestructive tests
Positron evaluation of hydrogen in a 17 nickel maraging steel (Moore, Cocks, and Jones), Sept., 309
Nuclear fuel cycles
Reference materials—what is available? (Bingham), Nov., 388
Nuclear reactor materials
Prediction of the shift in the brittle-ductile transition temperature of light-water reactor (LWR) pressure vessel materials (Metal Properties Council Subcommittee 6 on Nuclear Materials), July, 237
Numerical analysis
Experimental analysis and numerical simulation of Marshall method of asphalt con-

crete mix design (Mamlouk and Manolis), March, 99
Numerical analysis of ductile fracture experiments using single-edge notched tension specimens (Hollstein, Schmitt, and Blauel), May, 174
Observations
Contextual effects in category ratings (Lawless), Sept., 346
Perception
Contextual effects in category ratings (Lawless), Sept., 346
Photographic film
Safety considerations for photographic film in the X-ray screening of air travelers' luggage (McIninch), Nov., 368
Plastics
New test method for determining environmental stress-crack resistance of ethylene based plastics (Crissman), July, 273
Police
Passenger screening requirements—the view from Europe (Keane), Nov., 381
Polyethylene
New test method for determining environmental stress-crack resistance of ethylene based plastics (Crissman), July, 273
Porosity
Most probable pore-size distribution in fluid filter media I. Evidence of such a distribution from results of extended bubble-point measurements (Johnston), March, 117
Most probable pore-size distribution in fluid filter media II. Determining the size of the average pore from fluid permeability measurements (Johnston), March, 122
Positron
Positron evaluation of hydrogen in a 17 nickel maraging steel (Moore, Cocks, and Jones), Sept., 309
Powder alloys
Constant amplitude fatigue study of an aluminum powder metallurgy alloy (Santner and Campbell), Sept., 333
Precision
Reference materials—what they are and how they should be used (Taylor), Nov., 385
Pressurizing
Stressing for test purposes of materials in tubular form using elastomeric inserts—practical testing procedures (Mosley), May, 182
Probability theory
Certificate values—what do they mean and how they should be used (Ku), Sept., 350
Random sampling
Variances in sampling streams of coals (Rose), Sept., 320
Ratings
Contextual effects in category ratings (Lawless), Sept., 346
Residual stress
Confidence limits of stress values measured by X-ray diffraction (Kurita), March, 143
Fracture mechanics analysis of the effects of residual stress on fatigue life (Throop), Jan., 75
Rheological properties
Temperature effect on rheological properties of cattle manure slurry (Chen and Shetler), Nov., 360
Rings
Analysis of an internally radially cracked ring segment subject to three-point radial loadings (Gross and Srawley), Nov., 357

S

Sampling
Mechanical sampling with stopped-belt accuracy (Ellis), March, 106
Screening
Passenger screening requirements—the view from Europe (Keane), Nov., 381
Sealers
Basis for predicting longtime behavior from short-time tests of geothermal sealants (Kearsley), July, 299
Security
Cost-effectiveness of the passenger security screening system (Childs), Nov., 376
Introduction to symposium on controlled access screening for airport security areas (Battema), Nov., 365
Training the security screening station operator (Hunter), Nov., 379
Slurries
Temperature effect on rheological properties of cattle manure slurry (Chen and Shetler), Nov., 360
***S–N* diagram**
Fracture mechanics analysis of the effects of residual stress on fatigue life (Throop), Jan., 75
Solids
Temperature effect on rheological properties of cattle manure slurry (Chen and Shetler), Nov., 360
Specialized training
Training the security screening station operator (Hunter), Nov., 379
Sputtering
New transducer to monitor fatigue crack propagation (Liaw, Hartmann, and Logsdon), May, 202
Standards
Certificate values—what do they mean and how they should be used (Ku), Sept., 350
Reference materials—what is available? (Bingham), Nov., 388
Review of the effects of fatigue cracking loads on plane strain fracture toughness (Towers), Jan., 27
Steel castings
Life expectancy for fossil steam turbine casings after 100 000 hours (Coulon, Saisse, and Thauvin), Jan., 16
Steels
Effects of temperature on the fracture toughness of carburizing steels for high-temperature applications (Cutler and Leslie), Jan., 3
Numerical analysis of ductile fracture experiments using single-edge notched tension specimens (Hollstein, Schmitt, and Blauel), May, 174
Strains
On the yield loads of plates with array of holes (Jindal and Mandal), May, 208
Stratified random sampling
Variances in sampling streams of coals (Rose), Sept., 320
Stress concentration
On the yield loads of plates with array of holes (Jindal and Mandal), May, 208
Stress corrosion tests
New test method for determining environmental stress-crack resistance of ethylene based plastics (Crissman), July, 273
Stresses
Analysis of an internally radially cracked ring segment subject to three-point radial loadings (Gross and Srawley), Nov., 357
Analysis of nonlinear behavior of asphalt concrete during Marshall test (Mamlouk, Yuan, Tseng, and Lee), Sept., 327
On the yield loads of plates with array of holes (Jindal and Mandal), May, 208
Stressing
Stressing for test purposes of materials in tubular form using elastomeric inserts—practical testing procedures (Mosley), May, 182
Stress relaxation
Determination of stress relaxation by damping measurements (Weissmann), Jan., 79
Structural steels
Confidence limits of stress values measured by X-ray diffraction (Kurita), March, 143
Subcritical crack growth
New method for the determination of the critical value of crack tip opening displacement at the initiation of crack growth using a single three-point bend specimen (Lai and Zhang), Sept., 340
Systematic sampling
Variances in sampling streams of coals (Rose), Sept., 320

T–X

Tension tests
Fractographic examination in the scanning electron microscope as a tool in evaluating through-thickness tension test results (McDonald and Ludwigson), May, 165
Test specimens
Fatigue crack front shape and its effect on fracture toughness measurements (Towers), Jan., 34
Thermocouples
Short-range ordering in nickel-chromium thermocouple alloys (Pollock), May, 225
Three-point bend specimen
New method for the determination of the critical value of crack tip opening displacement at the initiation of crack growth using a single three-point bend specimen (Lai and Zhang), Sept., 340
Threshold stress intensity factor
Improved method for threshold fatigue crack propagation testing on an electromagnetic resonance type machine (Nishijima, Matsuoka, and Ohtsubo), May, 193
Toughness
Prediction of the shift in the brittle-ductile transition temperature of light-water reactor (LWR) pressure vessel materials (Metal Properties Council Subcommittee 6 on Nuclear Materials), July, 237
Summary report of round robin testing by the ASTM task group E24.01.06 on rapid loading plane-strain fracture toughness K_{Ic} testing (Shoemaker and Seeley), July, 261
Transition temperature
Prediction of the shift in the brittle-ductile transition temperature of light-water reactor (LWR) pressure vessel materials (Metal Properties Council Subcommittee 6 on Nuclear Materials), July, 237
Tubes
High pressure fatigue testing with results for tubing and fittings (Findley and Reed), March, 156
Stressing for test purposes of materials in tubu-

lar form using elastomeric inserts—practical testing procedures (Mosley), May, 182
Value engineering
Certificate values—what do they mean and how they should be used (Ku), Sept., 350
Vibration tests
Vibratory cavitation tests at 200-kPa (2-bar) suppression pressure (Zhou and Hammitt), March, 134
Weibull density functions
Constant amplitude fatigue study of an aluminum powder metallurgy alloy (Santner and Campbell), Sept., 333
Welding
Predicting heat-affected zone hardness by the weld test method (Bibby, Chong, and Goldak), March, 126
X-ray inspection
Cost-effectiveness of the passenger security screening system (Childs), Nov., 376
Effectiveness of passenger security screening—an overview (Tsacoumis), Nov., 366
Safety considerations for photographic film in the X-ray screening of air travelers' luggage (McIninch), Nov., 368
X-ray stress analysis
Confidence limits of stress values measured by X-ray diffraction (Kurita), March, 143
